CRAAP TEST

When you search the Web, you're going to find a lot of information . . . but is it accurate and reliable? You will have to determine this for yourself, and the CRAAP Test can help. The CRAAP Test is a list of questions you can ask yourself in order to determine if the information on a web site is reliable. Please keep in mind that the following list of questions is not static nor is it complete. Different criteria will be more or less important depending on your situation or need. So, what are you waiting for? Is your web site credible and useful, or is it a bunch of . . .!

Applying the CRAAP Test to Evaluating Web Sites Currency: The timeliness of the web page.

If relevant, when was the information gathered?
When was it posted?
When was it last revised?
Are links functional and up-to-date?
Is there evidence of newly added information or links?

Relevance/Coverage: The uniqueness of the content and its importance for your needs.

What is the depth and breadth of the information presented?

Is the information unique?

Is it available elsewhere, in print or electronic format?

Could you find the same or better information in another source?

Who is the intended audience? Is this easily determined?

Does the site provide the information you need?

Your overall assessment is important. Would you be comfortable using this source for a research paper?

Authority: The source of the web page.
